

REMARKS

The Advisory Action dated October 29, 2007 has been fully considered by the Applicant.

Attached is a Petition for a Two-Month Extension of Time and a check in the amount of \$460 to cover the fee.

Claim 1 has been currently amended. Claims 2-11 and 13-17 have been previously presented. Claim 12 has been canceled

Claim 1 has been currently amended, as suggested by Examiner Miller, to further clarify Applicant's "generic commands".

Currently amended claim 1 includes a receiver for digital data which is broadcast from a remote location comprising a storage means which allows the selective storage of received data therein; a control system for the control of the storage means and the storage of data therein and the storage means includes a single "first in first out" buffer which includes generic commands, the structure of the generic commands allowing commands for the control system for automating the bulk transfer of the data to and from the storage means to be intermixed in the buffer with read/write commands for the control of the storage of the data in the storage means.

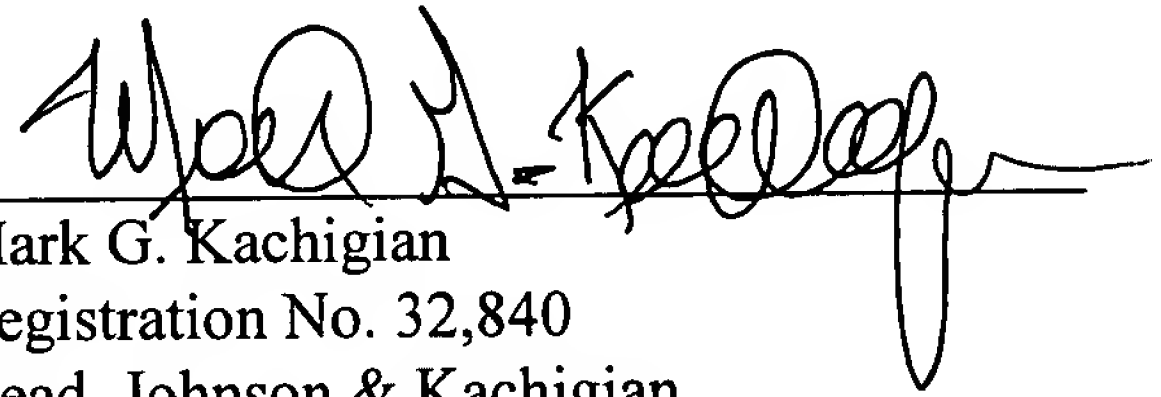

Applicants believe that currently amended claim 1 is patentable over the cited references. Therefore, Applicants respectfully request reconsideration of the rejection.

Claims 2-11, 13-15 depend upon currently amended independent claim 1 and are believed to be patentable over the cited references.

Applicants believe that previously presented independent claim 16, along with dependent claim 17, is novel over the cited references for the same reasons set forth in the Amendment dated September 20, 2007.

It is believed that the foregoing is fully responsive to the Advisory Action. If any issues remain, a telephone conference with the Examiner is requested. If any fees are associated with this action, please charge Account No. 08-1500.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'Mark G. Kachigian', is written over a horizontal line.
